20	21	22	23	24	25	26	18	19	20	21	22	23	24	22	23	24	25	26	27	28
27	28	29	30				25	26	27	28	29	30	31	29	30					

I hereby authorize the work on this and the following pages to be done along with the necessary material. I grant Rex Marine permission to operate the boat and/or equipment hereon described for the purpose of testing and inspection. The yard is not responsible for fire, theft, vandalism, or incidents beyond their control. An express mechanics lien is hereby acknowledged on above boats and/or equipment to secure the amount of repairs thereto.

I have 3 days upon notification of completion to pick up my boat, if summer arrangements with Rex have not been made. I agree to pay daily storage rate of 50-cents per foot for land storage or \$2.00 per foot for in-water boats remaining 3 days after notification.

Be sure any existing balance has been paid. We can not schedule or initiate a work order or begin Spring Commissioning until all past due bills are paid in full.

Leave a key, lock combination, or key hiding place. To expedite your service, we must have a set of keys (or combination) available before scheduled work can begin. There will be a \$25 service fee assessed if no key is provided at the time of servicing.

Lines and fenders of appropriate length and size must be on board for launch and will be supplied and charged to my work order if necessary. Shore electrical power cord is needed prior to work commencing if boat is so equipped.

Remove Your Boat and Trailer ASAP. Winter storage period ends April 15. All boats remaining on land thereafter without a launch date will be charged a daily storage fee of 50-cents per foot. A charge of \$75 will be applied if we must relocate your boat after April 15 to accommodate summer customers. We do not provide summer storage for trailers and can not be responsible for trailers left in the yard. Trailers left behind will be moved offsite and assessed daily storage charges.

Leaking Boats. Owners are responsible for leaking boats whether or not they are present at launch. Of course, Rex employees will make reasonable efforts to assist leaking boats at prevailing rates.

Update and sign the credit card authorization below. Your credit card number must be supplied to facilitate payment. Writing "On File" is not accepted and may cause delays to your spring launch. Payment in full is due upon completion of your work order. We will mail your invoice upon completion. We may charge your unpaid balance to your credit card within six days of the postmark on your invoice unless you make other arrangements. Charges will be posted to your card immediately if your boat is removed prior to payment.

CUSTOMER NAME: _____ CUSTOMER # (internal use): _____

CREDIT CARD AUTHORIZATION

Here is my credit card info, per your policy. However, I intend to use alternate payment method, but you may charge this account if necessary to comply with Rex payment Policy.

I wish to use this credit card account as a method of payment to cover my Spring Commissioning. This signed authorization allows Rex Marine Center to bill my card company for my Spring Commissioning work order upon completion of work.

I agree to pay late fee of 1.5% per month, 18% annually on balance due if credit card I have provided can not be charged due to mis-information or decline.

SYSTEMS AND ACCESSORIES CHECK LIST

ALL RATES ARE TIME & MATERIALS UNLESS SPECIFIED. (\$103/hour)

COMMISSION SYSTEMS (Hourly Rate)

- | | |
|--|--|
| COM01 <input type="checkbox"/> All Systems & Perform Safety Check
COM02 <input type="checkbox"/> Ice Maker
COM03 <input type="checkbox"/> Salt Water Washdown
COM04 <input type="checkbox"/> Refrigerator
COM05 <input type="checkbox"/> Baitwell
COM06 <input type="checkbox"/> Air Conditioner(s)
COM07 <input type="checkbox"/> Head/Waste
COM08 <input type="checkbox"/> Fresh Water (incl. Hot Water Heater) | COM09 <input type="checkbox"/> Fishwell
COM10 <input type="checkbox"/> Generator
COM11 <input type="checkbox"/> Safety Check;
Navigation Lights, Bilge Pump, Blower, Horn
(non-operating items will be repaired at Time & Material) |
|--|--|
- I Do NOT need Rex Marine to Commission Any systems or perform a Safety Check at this time

- SW04 Remove Shrinkwrap and Frame (includes Recycling Program Costs) \$3.50/ft
 I will remove my Shrinkwrap and Frame and dispose of it off of Rex Marine Property, Set up my Canvas Prior to Rex servicing my boat, & Notify Rex When done.

BATTERY SERVICES

- BA10 Maintain Battery(ies)/Terminals/Cables and Charge Battery as Necessary Time & Material
 BA05 Reinstall Battery(ies) Time & Material, Typically .5/hr per Battery
 BA09 Load Test and Install New if Needed Time & Material BA11 Check Charging System Time & Material
 I Do NOT need Rex Marine to perform any battery services at this time, (I will have a charged battery in place & connected prior to servicing)

BOTTOM PAINTING SERVICES (ANTIFOULING)

- BP99 Additional Preparation Time for Painting Beyond Minor Preparation due to Fouling / Peeling Hourly Rate
 HLBP Unload from Trailer, Reload or Launch (Discounted for Rex Painting) \$4.00/ft
 I Do NOT need Rex Marine to Perform any antifouling services at this time.

NEW BOAT (NOT PREVIOUSLY PAINTED HULLS) *Materials Included*

Includes establishing water line, solvent wash, primer coat, one coat bottom paint. Additional charges apply for Trim Tabs and Washing Hull if necessary for painting process.

- BP03 Under 30 Feet 30.50/ft BP04 30 Feet and up \$32.50/ft

BOTTOM PAINTING (PREVIOUSLY PAINTED HULLS) (layers buildup, non-eroding) *Materials Included*

Includes Minor Preparation, Material, 1 Coat Epoxy-based Paint, Trim Tabs if previously painted. ****Materials Included****

- BP01 Under 30 Feet 15.25/ft BP05 Additional Coats Under 30 Feet \$14.25/ft
 BP02 30 Feet and up 16.25/ft BP09 Additional Coats 30 Feet and up \$15.25/ft

ABLATIVE BOTTOM PAINTING (PREVIOUSLY PAINTED HULLS) (Self polishing, minimal buildup)

Includes Minor Preparation, Material, 1 Coat Ablative Paint, Trim Tabs if previously painted. ****Materials Included****

- BP01M Under 30 Feet 17.75/ft BP05M Additional Coats Under 30 Feet \$16.75/ft
 BP02M 30 Feet and up 18.75/ft BP09M Additional Coats 30 Feet and up \$17.75/ft

WASH, WAX, COMPOUND, TEAK SERVICES

- W01 Hull Wash and Wax under 30 feet. \$11.50/ft
 W011 Hull Wash and Wax 30 feet and over \$12.50/ft
 W02 Wash and Wax Rubrail Up (All boats) (Range \$12.00/ft—\$15.00/ft) Time and Material
 CMPD01 Compound Areas of Hull/Topsides Time and Material
 CLN01 Clean/Vacuum Interior Time and Material
 CLN02 Wash Boat and Air Dry \$4.00/ft
 CLN08 Wash Entire Boat, Dry Boat, Clean Cabin/Interior Time and Material
 DETAIL Detail Interior of Boat Time and Material
 TK01 All Work Relating to Teak Upon Request
 I Do NOT need Rex Marine to Perform any cleaning services at this time.

GENERATOR SERVICES

- GENEMP Rebuild Engine Mounted Seawater Pump (Provides Cooling Water for Generator) Time and Material
 GEN02 Tune-Up Generator Time and Material
 GEN03 Change Antifreeze in Generator Time and Material
 GENOIL Change Generator Oil and Filter \$67.00
 I Do NOT need Rex Marine to perform any Generator Services at this time or do not have a Generator

NEW SUMMER REPEAT SERVICES ***NEW***

- CHECK Periodic Maintenance Check— Start up Motor, Check Battery, Check Fluids, Belts, Hoses (\$103)
Also available off-site (no Road Service Fee if Rex has multiple boats to service at the same location)
 This is especially good for boats that have not been used in a while, as batteries may drain down over time or from bilge pump operation
- WASH Wash Boat and let Air Dry (available off site after Memorial Day)
 REXFUEL Fuel up Rack Stored Boats on Hauling (\$25 plus cost of Gasoline) (Fee waived if done with washing)
 PUMP Pump Waste Tank (Fee waived in conjunction with fueling or washing services, \$25 fee if done independently)
- I want the checked services performed every _____ days starting on _____ at _____ Slip _____
 I Do NOT need Rex Marine to perform any repeat services at this time

FOR INTERNAL USE

- HL25 Move Rack Stored Boat to Work Bunk / Return to Rack Storage
 HL121 Launch / Retrieve Rack Boat for Sea Trial / Rex Service
 COV09 Remove Winter Dust Cover, Fold, and Place in Boat
 CLN071 Wash

REX MARINE NOW OFFERS ROAD SERVICES AT A DOCK AWAY FROM REX MARINE

STERNDRIVE ENGINE COMMISSIONING

ALL RATES ARE TIME & MATERIALS UNLESS SPECIFIED.
(LABOR RATE IS \$103./HR.)

CUSTOMER NAME: _____

PLEASE CHOOSE TUNE-UP OR COMMISSION ONLY

Rex technicians recommend a full tune-up each spring to help assure trouble-free boating. Check your owner's manual for more information. PARTS AND MATERIALS ARE EXTRA and vary depending on model.

Most tune-ups include:

Reconnect Battery(ies). (Charging additional if needed)

Check all fluid levels and top off as necessary

Install new spark plugs, rotor, distributor cap and other ignition parts as necessary (Points & condenser systems subject to additional labor)

Inspect drive belts and hoses.

Start and run engine

Check for satisfactory flow of cooling water

Remove, clean and reinstall flame arrester

Set timing, idle speed and dwell, as applicable

Visually check gauges for proper indication

Verify normal shifting

Boats with difficult access may require additional labor charges

Newer boats with platinum spark plugs have longer service intervals but the cap and rotor are still susceptible to condensation and should be replaced more often.

SDT4/T42	<input type="checkbox"/> Tune 4 Cylinder Engine(s) and Commission (materials additional)	Single \$204.00	Twin \$408.00
SDT6/T62	<input type="checkbox"/> Tune 6 Cylinder Engine(s) and Commission (materials additional)	Single \$237.00	Twin \$474.00
SDT8/T82	<input type="checkbox"/> Tune 8 Cylinder Engine(s) and Commission (materials additional)	Single \$258.00	Twin \$517.00
SDCAP	<input type="checkbox"/> Replace Cap & Rotor and Commission Engine (Do not Replace Spark Plugs) (materials additional)	Single \$180.25	Twin \$249.25

OR

Commission only: Reconnect Battery(ies), charging additional if necessary. Check all fluid levels; top off as necessary. Inspect belts and hoses. Start and run engine dockside or on a flush attachment, check for satisfactory flow of cooling water. Visually check gauges. Verify normal gear shifting. Report unsatisfactory operation to owner. This abbreviated service is recommended only for engines that have very low hours since last tune-up and no known operating problems. *Minimum needed if not doing Tune-up or Cap & Rotor replacement*

SDCOM/COM2	<input type="checkbox"/> Commission Engine (Do not perform Tune-up)	Single \$103.00	Twin \$172.00
------------	---	-----------------	---------------

ADDITIONAL ENGINE SERVICES

Replace Fuel Filters: Rex advises you do this each spring to protect your engine from water, rust, sediment and other contamination sources. Especially important with fuel blends now containing ethanol.

FFG	<input type="checkbox"/> Replace Fuel Filters (Recommended at least every spring)	Time and Material
-----	---	-------------------

ECM Scan: Engines fitted with electronic fuel injection (EFI) require electronic control module (ECM) scan diagnostic check at additional charge. Mercury recommends ECM be downloaded to check for fault/trouble history and cleared of codes at the start of a new season.

EFI/2	<input type="checkbox"/> Decode (ECM) Electronic Fuel Injection Engine	Single \$51.50	Twin \$103.00
-------	--	----------------	---------------

Replace Spark Plug Wires: Recommended every three years. Age-related physical deterioration affects the ability of wires to provide proper spark to the cylinders. Typical labor time is 30 minutes to one hour per engine, plus materials.

ENG03	<input type="checkbox"/> Replace Spark Plug Wires	Time and Material
-------	---	-------------------

Thermostat overhaul: Remove & clean housing; replace thermostat and gaskets.

THERM	<input type="checkbox"/> Thermostat Overhaul	Time and Material
-------	--	-------------------

Replace Seawater pump impeller: (Also housing and gaskets on the Alpha Drives, or wear plates and gaskets on Older Bravo I, II, and III drives). Rex recommends that the impeller assembly be replaced every three years. Average labor time for impeller replacement for Alpha drives is one hour per engine when the work is done along with the Sterndrive Preventive Maintenance Program. Otherwise additional labor is required. Newer Bravo drives have a brass pump housing which is susceptible to wear and typically needs to be replaced along with the impeller service. Average labor time is 3-5 hours depending on access along with the cost of the parts (parts \$400-\$600 per engine).

SDEMP/2	<input type="checkbox"/> Replace engine Mounted Seawater Pump Impeller(s)	Time and Material
SDDMP/2	<input type="checkbox"/> Replace Sterndrive Mounted Pump (When done in Conjunction with Alpha Service)	\$103.00 Per Sterndrive

Oil and Filter Change: Rex advises that you consider changing engine oil mandatory unless oil was changed during the previous winter service. Operating with last season's oil can cause excessive wear and internal damage leading to shortened engine life. Change oil at least once yearly and with no more than 50 hours between changes. We consider every hour of marine operation equivalent to 100 miles of driving your car. Non-remote oil filters or twin engine installations may increase costs. Engine commissioning NOT included.

OI4/2	<input type="checkbox"/> Oil and Filter Change (Recommended at least every fall (and every 50hrs)	Single \$74.00	Twin \$148.00
-------	---	----------------	---------------

- See Reverse-

Freshwater Cooling System Service: Drain and replace engine coolant on closed cooled engines. Recommended every two years when standard (green) coolant is used and every five years when extended life (pink) coolant is used. Coolant fluids are additional. (Five year coolant is used in late model Mercruiser engines and is available upon request for older engines.

SDFWC/2 Service Fresh Water Cooling System / Drain and Replace Coolant Time and Material

Engine Drive Belt Service: Check condition & replace/adjust as necessary.

BELT01 Check Belts (Replace as Necessary) Time and Material

Engine Hose Service: Check condition & replace as necessary.

HOS01 Check Hoses (Replace as Necessary) Time and Material

I Do NOT need Rex Marine to Perform any Engine Servicing at this time, I will perform my own commissioning and servicing.

LIFT OPERATIONS

HLUSEA Unload boat from Trailer for Sea Trial \$4.00 / ft HLRACK Unload boat for Summer Rack Storage \$4.00 / ft
HLRSEA Reload boat on trailer after Sea Trial \$4.00 / ft HLOP Unload boat from Trailer and Launch for Pick up \$8.00 / ft

ON-WATER SERVICES

Sea Trials are highly recommended for boats older than three years. They are also recommended any time your boat has been serviced to correct a problem that occurs under load. During the sea trial, qualified Rex personnel observe and record: temperatures, pressures, charging system operation, engine acceleration and the functioning of other engine related systems. The typical sea trial takes one hour. Sea trial charges are additional to the tune-up price or other servicing.

SEA01 SEA TRIAL BOAT (Recommended for boats older than three years) \$100.00

FUEL01 FUEL BOAT WITH FRESH FUEL / DIESEL Time & Material

CAPT DELIVER BOAT TO MY MARINA AT _____ SLIP _____ Time & Material (Per Person)

I Do NOT need Rex Marine to Perform any On-water Services at this time.

STERNDRIVE SERVICES

Anodes/zincs will be replaced if necessary at additional charge. Bearing carrier anode will be replaced while prop is removed for servicing. These are sacrificial pieces of metal designed to wear away to protect your sterndrive from corrosion. Minimally this needs to be done every spring. Bravo III drives it is recommended to replace anodes every 3 months.

ZNTT Replace Trim Tab Anodes (Zincs) Time and Material

ZNSD Replace Sterndrive Anodes (Zincs) Time and Material

I Do NOT need Rex Marine to replace my anodes at this time. (I understand these need to be replaced annually, more on some models)

Sterndrive and Transom Assembly Antifouling: This protection is necessary annually if you keep your boat in the water. New drives should have at least one coat, then one fresh coat each season. Not painting your drive can result in serious performance issues mid-season as well as damage the sensitive rubber products sealing your sterndrive to your boat. Our price includes basic preparation and materials. Fouled units (having barnacle seats and growth on) will require extra labor at hourly rates.

SD10/SD102 Antifoul Sterndrive(s) (one coat) \$77.00 AND \$25.00 Material per unit

SD16/SD162 Antifoul Transom Assembly(ies) (one coat) \$77.00 AND \$20.00 Material per unit

I Do NOT need Rex Marine to Antifoul my Sterndrive or Transom assembly)

STERNDRIVE PREVENTIVE MAINTENANCE PROGRAM: ALPHA(SD36), BRAVO (SD41)DRIVES: This comprehensive program should be performed every other year on Bravo drives and at least every third year on Alpha drives along with replacing the water pump on Alpha. Unknown existing, or potential problems, can often be detected and corrected before a serious breakdown shortens your season.

Remove drive and inspect and service transom assembly. Lubricate gimbal housing bearings, universals and shift cables. Inspect all bellows and hoses in transom assembly.

Drain gear lube. Pressure check upper and lower gear case seals. Refill gearcase with factory gear lube.

Clear external water intakes as necessary. Replace sterndrive anodes as necessary.

Remove gear lube reservoir, flush, reinstall and refill. Reinstall drive after checking engine alignment.

Remove propeller, grease propshaft, and re-install prop. Send prop(s) for reconditioning, if necessary. (Additional charge)

SD36/362 Alpha Sterndrive Preventive Maintenance Program (materials additional) Single \$325.00 Twin \$650.00

SDDMP/2 Replace Sterndrive Mounted Pump (When done in Conjunction with Alpha Service) \$103.00 Per Sterndrive

SD41/412 Bravo Sterndrive Preventive Maintenance Program Single \$352.00 Twin \$704.00

SD28/282: Change Gear Case Lube and Pressure Check Seals: This service is the bare minimum for sterndrives. This should be done at least annually with no more than 100 hours between services. This is also recommended after the initial 20 hour break in period. This service is highly recommended if you are not requesting the Preventive Maintenance Program discussed above. Mercruiser recommends lubricating the engine coupler which, based on access in most boats, usually can not be lubricated with out removing the drive as in our Preventive Maintenance Program. Elements include:

Clean water intakes as necessary, externally. Lubricate external grease fittings.

Drain gear lube, inspect for impurities. Refill gear case with factory gear lube.

Empty remote gear lube reservoir, clean and refill. Remove and replace drain plug and vent seals.

Pressure check upper and lower gear case seals, when applicable. Remove prop, clean and lube prop shaft, reinstall prop.

(Pressure check can sometimes not be done with the drive on the boat)

SD28/282 Change Gear Case Lube (Service Drive without Removal) Single \$155.00 Twin \$311.00

I Do NOT need Rex Marine to Perform any Sterndrive Servicing at this time.

NOTE: Please see the yellow "Accessory Services" page for other items that may apply to your boat. Please be sure to sign all pages and return to Rex Marine as soon as possible to avoid any delays in the Spring Launch of your boat.
